

Flt 16 Gaston #2 and transit STX to FLL

Submitted by **rferrare** on Sat, 09/11/2010 - 09:17

- **LASE**
- **Gaston**

Flight Date:

Sunday, September 5, 2010

Sortie Number:

16

LASE worked well during the flight. Water vapor was measured during about two-thirds of the flight and aerosols/clouds were measured during the entire flight. LASE measured water vapor along the north, eastern, and southern areas of the storm. There were no large areas of high dust scattering observed during this flight.

Status:

Green
